

M 20 – M 55 Vertical

The coilformers are made in gfr Polyamide PA66 of type p6g (RTI long-range temperature +125° C) and x2g5 (RTI long-range temperature +120° C). Pin material is tin bronze, tinned. Max. solder temperature +350° C, 2 sec. Special materials – e.g. irradiated cross-linked – and designs on request, dimensions in mm/inch.

This group of vertical coilformers is sorted by ferrite core / lamination size and each by pinning with straight pins and side-wrapping pins. Most designs feature terminal strips with “noses” which provide tension-relief of the winding wires and “stand-offs” which allow clean soldering of the coilformer onto the pcb to minimize cold-solder joints. Some coilformers also feature extended flanges to prevent clips sliding off.

Type	Order-Code	Accessories
Coilformer: M 55/1k/4-8/5.0-mq/p6g Solder-pin: z811/ua	01660-024 73297-212	on request
