

EE 8 – EE 32 Vertical

The coilformers are made in gfr Polyamide PA66 of type p6g (RTI long-range temperature +125° C), A RV250 nat. (RTI long-range temperature +100° C) and A3X2G10, sw (RTI long-range temperature +115° C). Pin material is tin bronze, tinned for solder-tags and brass, tinned for solder-tags. Max. solder temperature +350° C, 2 sec. Special materials – e.g. irradiated cross-linked – and designs on request, dimensions in mm/*inch*.

This group of vertical coilformers is sorted by ferrite core / lamination size and each by pinning with straight pins, side-wrapping pins, solder-tags and conventional coilformers.

Most designs feature terminal strips with “noses” which provide tension-relief of the winding wires and “stand-offs” which allow clean soldering of the coilformer onto the pcb to minimize cold-solder joints. Some coilformers also feature extended flanges to prevent clips sliding off.

Type	Order-Code	Accessories
Coilformer: EE 16/1k/9-6/3.75-cc/A RV250 nat.	09847-106	Spring-Clip SB-EF 16
Coilformer: EE 16/2k/9-6/3.75-cc/A RV250 nat.	09848-106	
Solder-pin: z608/ua	73264-212
