

EE 12.6 – EE 25 Horizontal/ longer creepage

The coilformers are made in grf Polyamide PA66 of type A RV250 nat. (RTI long-range temperature +100 °C). Pin material is tin bronze, tinned. Maximum solder temperature 350 °C, 2sec.

Special materials – e.g. irradiated cross-linked – and designs on request, dimensions in mm/inch.

NORWE now is designing to expand the series of EE/M coilformers horizontal EE 12.6 to EE 25 with longer creepage-dimensions between ferrite and solder-pin. The design allows automatic winding also on NC winding machines. Special winding noses and also a wire routing provide tension-relief when binding on the wire. The coilformers have distance strips to avoid cold-solder joints into the PCB.

Type	Order-Code	Accessories
Coilformer: EE 16/1k/K9/7-6/2.5-eh/A RV250 nat.	09863-106	Spring-Clip SB-EF 16
Coilformer: EE 16/2k/K9/7-6/2.5-eh/A RV250 nat.	09864-106	
Solder-pin: z607/ua	73263-212
