

## ETD Safety Class Coilformers Concentric Design

The coilformers are made in gr Polyamide PA66 of type A RV250 nat. (RTI long-range temperature +100° C). The solder-tags are punched from brass and are subsequently tinned. Max. solder temperature +350° C, 2 sec. Special materials – e.g. irradiated cross-linked – and designs on request, dimensions in mm/inch.

The ETD safety class coilformers have the advantage that the primary and secondary windings are wound separately on the coilformer halves, with the two windings pushed together to form a complete winding assembly.

Elaborate description of the designs please see catalogue-info.

### Type

Coilformer: ETD 34/prim/s-/5.08-m/A RV250 nat.  
Solder-tag: s18/wd
