

RM-SMD Coilformers (fu)

The coilformers are made in gfr Polyphenylene Sulfide PPS of type torA504 (RTI long-range temperature +130°C) or made in gfr Polyamide PA66 of type A3X2G10 (RTI long-range temperature +115°C) and are suitable for reflow soldering.

Pin material: tin bronze, tinned.
Special materials – e.g. irradiated cross-linked – and designs on request, dimensions in mm/*inch*).

The coilformers are fitted with U-shaped terminals. The two sides of the terminals allow automatic binding-on and soldering of the wires, leaving the pcb-side of the terminal free from tin. The tolerance compensator TA on the top flange eliminates the otherwise required insulation washer.
