

ER-SMD Coilformers (fm)

The coilformers are made in gfr Polyphenylene Sulfide PPS of type torA504 (RTI long-range temperature +130°C) and are suitable for reflow soldering.

Pin material: tin bronze, tinned.
Special materials – e.g. irradiated cross-linked – and designs on request, dimensions in mm/*inch*).

The coilformers are fitted with “gull-wing” terminals. To prevent melt-out, these should ideally be mechanically secured when soldering on the wires. Instead of glueing the ferrites, use can be made of the SB-ER spring clips.

In addition a new version for automatic winding has been improved once again.

Type	Order-Code	Accessories
Coilformer: ER 9.5/5-SMD1/1k/11.0/8f-625-/torA504	94219-132	Spring-Clip SB-ER 9.5/5
Solder-pin: fm625-35/ub	75802-213	
Solder-pin: f625-35/ub	75852-213
