

EFD-SMD Coilformers (fu)

The coilformers are made in gfr Polyphenylene Sulfide PPS of type torA504 (RTI long-range temperature +130°C) and are suitable for reflow soldering.
Pin material: tin bronze, tinned.
Special materials – e.g. irradiated cross-linked – and designs on request, dimensions in mm/inch.

The coilformers are fitted with U-shaped terminals. The two sides of the terminal allow automatic binding-on and soldering of the wires, leaving the pcb-side of the terminal free from tin.
Automatic placing of the coilformer and the ferrites is possible by using a Snap-on Cap. This cap is spring-loaded and keeps the ferrites and coilformer together. The coilformers are available with single, double and four sections.
