

Spring-Clips SB-U

Glueing methods are usually used to connect and secure the ferrite cores. Glues, such as Araldite, require the ferrite cores to be kept under constant pressure until the glue has hardened. A more advantageous and quicker method is by using stainless steel clips SB. The holding pressure is almost constant over the whole operating temperature range.

One clip is required to assemble a wound coilformer with one pair of ferrite cores. The use of a drop of glue is recommended, to connect the ferrites to the coilformer and to prevent frequency noise. Dimensions in mm/inch.

When ordering please quote type and order-code.

| Type | Order-Code | A | B | C | D | I |
|---------|------------|--------------|--------------|-------------|-------------|-------------|
| SB-U 10 | 78930-085 | 17.8 / 0.701 | 11.4 / 0.449 | 3.0 / 0.118 | 2.9 / 0.114 | 0.3 / 0.012 |
