

## U Standard Coilformers

The coilformers are made in gfr Polyamide PA66 of type p6g (RTI long-range temperature +125°C).  
Pin material: tin bronze, tinned.  
Maximum solder temperature 350°C, 2 sec.  
Special materials – e.g. irradiated cross-linked – and designs on request, dimensions in mm/inch.

The coilformers have through-hole round pins for contacts on both sides. The terminal strips usually feature "noses" which provide tension-relief, identification-noses (hole in the pcb) and "stand-offs" which allow clean soldering of the wires and of the coilformer onto the pcb.

Type	Order-Code	Accessories
