

EI, UI Coilformers

The coilformers are made in Polyamide PA66 of type p6g (RTI long-range temperature +125°C). The material used is tin bronze, tinned (solder-pins) or brass, tinned (solder-tags). Maximum solder temperature 350°C, 2 sec. (Special materials and designs on request, dimensions in mm/inch).

Due to their designs with different connection systems (press-fit pins, bent over pins, solder-tags, etc.) the coilformer-versions allow radial as well as axial binding on of the wires, matching your individual fields of application.

We are about to draw up a catalogue of this extensive series step by step – you will find the latest survey of available components on our homepage. For special designs and dimensions as well as available accessories please contact our technical specialists.

Type	Order-Code	Accessories
Coilformer: 2UJ 48b/1k/2g2-/5.0-kv/p6g	09210-024	on request
Solder-tag: g2c/wc	71070-259
