

UL 746D certification

UL 746D is an international standard from Underwriter Laboratories UL. This standard defines the requirements for identification and traceability for production of items made of plastic materials with a view to providing fast, reliable evidence about the identification of the plastic material used.

The binding guidelines and in particular the regular checks on them, which guarantee seamless traceability of the plastic materials used from procurement through processing to shipping of the items, are important elements of UL 746D. This applies both to new items and to the use of components of reprocessed materials where permitted.

Monitoring of the UL 746D guidelines

Compliance with the UL 746D guidelines is monitored by means of regular unannounced inspections by UL employees – normally 4 x a year.

This means our customers can always be sure that NORWE only uses the required materials in the agreed quality and also complies with the relevant manufacturer guidelines in terms of processing.

A tradition of quality at NORWE

In accordance with UL, all plastic items used must be made by a manufacturer certified in accordance with UL 746D in order to reflect the process chain for materials and processing.

NORWE has had uninterrupted UL 746D accreditation since 1997 and therefore provides reliable, long-term support for its customers with more extensive UL listing of its electrical and electronic components.

Our specialists will be pleased to provide you with any further information you may require.

The appearance of a company's name or product in this database does not in itself assure that products so identified have been manufactured under UL Solutions' Follow - Up Service. Only those products bearing the UL Mark should be considered to be Certified and covered under UL Solutions' Follow - Up Service. Always look for the Mark on the product.

UL Solutions permits the reproduction of the material contained in Product iQ subject to the following conditions: 1. The Guide Information, Assemblies, Constructions, Designs, Systems, and/or Certifications (files) must be presented in their entirety and in a non-misleading manner, without any manipulation of the data (or drawings). 2. The statement "Reprinted from Product iQ with permission from UL Solutions" must appear adjacent to the extracted material. In addition, the reprinted material must include a copyright notice in the following format: "©2025 UL LLC."
