

ETD Safety Class with Spacers DR

Spacers are made in gfr Polyamide PA66 of type A RV250 nat. (RTI long-range temperature +100°C), or gfr Polyethylene Terephthalate PET of type SKYT.5220FR (RTI long-range temperature +155°C). Special materials – e.g. irradiated cross-linked – and designs on request, dimensions in mm/*inch*.

The application of spacers DR in round winding section is advantageous for achieving required creepage and clearances between primary and secondary, and to the core. The spacers can be used cumulative for all dimensions.

When ordering please quote type and order-code.
