

EE-SMD-Coilformers (fu)

The coilformers are made in gfr Polyphenylene Sulfide PPS of type torA504 (RTI long-range temperature +130°C) and are suitable for reflow soldering.

Pin Material: tin bronze, tinned.
Special materials – e.g. irradiated cross-linked – and designs on request, dimensions in mm/inch.

The coilformers have U-shaped terminals. This allows automatic binding-on of the wires, and after soldering leaves the pcb-side of the terminal clean and free from tin. The coilformers are available with single or double section. Automatic placing of the coilformers is possible by using a Pick and Place Cap.
