

EFD – Coilformers with z8 Solder-pins

The coilformers are made in grf Polyamide PA66 of type A3X2G10 (RTI long-range temperature +115°C).
Pin material: tin bronze, tinned.
Maximum solder temperature 350°C, 2 sec.
Special materials – e.g. irradiated cross-linked – and designs on request, dimensions in mm/*inch*.

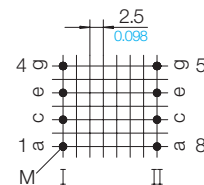

The coilformers are fitted with straight, sturdy z8 pins. Binding-on of the wires is axially. The pins are suitable for windings with thick wire. The terminal strips usually feature “noses” which provide tension-relief, and “stand-offs” which allow clean soldering of the wires and of the coilformer onto the pcb.
