

## EI, UI Coilformers

The coilformers are made in Polyamide PA66 gfr, UL 94 HB, temperature for longterm use at +130 °C. The material used is tin bronze, tinned (solder-pins) or brass, tinned (solder-tags). Maximum solder temperature 350 °C, 2 sec. (Special materials and designs on request, dimensions in mm/*inch*).

Due to their designs with different connection systems (press-fit pins, bent over pins, soldertags, etc.) the coilformer-versions allow radial as well as axial binding on of the wires, matching your individual fields of application.

We are about to draw up a catalogue of this extensive series step by step – you will find the latest survey of available components on our homepage. For special designs and dimensions as well as available accessories please contact our technical specialists.

| Type                        | Order-Code | Accessories |
|-----------------------------|------------|-------------|
| Coilformer: EJ 78/1k/pp/p6g | 06910-024  |             |
| Coilformer: EJ 78/2k/pp/p6g | 06911-024  |             |
