

## EI,UI Coilformers Horizontal

The coilformers are made in gfr Polyamide PA66 of type p6g (RTI long-range temperature +125°C). Pin material is tin bronze, tinned or brass, tinned for tags. Maximum solder temperature 350°C, 2sec. Special materials – e.g. irradiated cross-linked – and designs on request, dimensions in mm/inch.

Due to their designs with different connection systems (press-fit pins, bent over pins, solder-tags, etc.) the coilformer-versions allow radial as well as axial binding on of the wires, matching your individual fields of application.

We are about to draw up a catalogue of this extensive series step by step – you will find the latest survey of available components on our homepage. For special designs and dimensions as well as available accessories please contact our technical specialists.

| Type                                    | Order-Code                                                                                   | Accessories |
|-----------------------------------------|----------------------------------------------------------------------------------------------|-------------|
| Coilformer: EJ 66-33/1k/2g2-/5.0-qq/p6g | N0457-024  | on request  |
| Coilformer: EJ 66-33/2k/2g2-/5.0-qq/p6g | N0458-024  |             |
| Solder-tag: g2c/wc                      | 71070-259                                                                                    |             |
