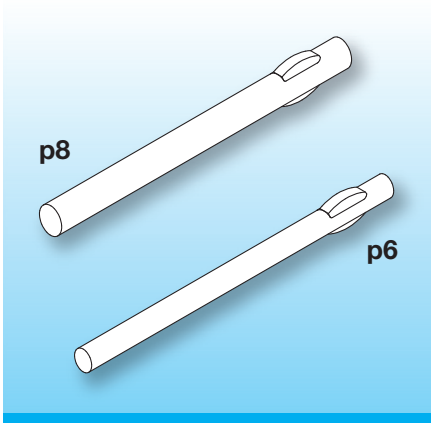
Classical Notched Press-Fit Solder-Pins (p)
with stamped notches, are made from drawn wire. The cut cross-sections are bare. This type of pin is preferred when pinning small quantities of components manually. Because of the notches this pin has limited use when pinning brittle plastic components.



The material of the pins is tin bronze CuSn 6, subsequently tinned.
They are cut to length (incremental steps of 1 mm/0.039 inch).
Special lengths or material on request, dimensions in mm/inch.

When ordering please quote type and order-code.
