

Side-Wrapping Solder-Tags

The solder-tags for side-wrapping and connection of flying leads. They are stamped from strip-material and tinned afterwards. The wire-wrapping area is slightly slimmer to avoid wires slipping. Stamped holes are at the other end, for connecting flying leads.

Special solder-tags can be produced to customers specifications, however, a minimum quantity of 250.000 pieces applies. Special materials and alternative finishes are available on request, dimensions in mm/*inch*.

When ordering please quote type and order-code.
